The Coryell Nursery

GROWERS OF

High Grade Ornamentals

"The Home of Quality Stock"

Located on Maple Avenue, one mile west of the
D. U. R. Interurban Waiting Room

BIRMINGHAM, MICH.

In 1905 this nursery was established by R. J. Coryell. Its aim has been to grow the hardy ornamentals best suited to the varying conditions of this state. Especial attention has been paid toward the propagation and growth of the most desirable native varieties, many of which are expensive to propagate and slow to start.

Our plants are grown with sufficient room to develop stocky tops and fibrous roots, thus insuring greater vitality and ability to take care of themselves. For this reason the three foot shrubs are better than most four foot plants; will grow quicker and not kill back so readily. The trees are given plenty of space and the evergreens are transplanted every two or three years and frequently sheared to afford abundant roots and symmetrical tops.

No agents are employed. This price list and the good will of many customers have sold the stock as fast as it can be grown. Many of the parks of this state, the University, the Agricultural College, and the Normal Schools are almost yearly customers. By owning our own land, reducing overhead charges to a minimum, and overseeing all the work, we are enabled to raise good stock and sell it at reasonable prices. We grow over 95 per cent of the stock we sell, and know that the plants are full of vitality when shipped.

We are prepared to make quick shipments via Grand Trunk and D. U. R. electric freight and Adams and National Express. Small packages may be sent by parcel post. Nearby points may be reached by truck. Orders for plants should be made early to insure receipt of shipment early enough for best results.
